

DMS
SOLUTIONS, INC.

OPTIMIZE PERFORMANCE.
INCREASE EFFICIENCIES.
MAXIMIZE OUTPUT.

Field Logistics Coordinator (FLC) presents customers with an assurance process that delivers proven results. FLCs provide logistical planning from forecasting thru execution by using DMS's systematic approach to predictable results. Our process begins with an evaluation of current manpower requirements, operational demands, and equipment constraints. DMS brings genuine field experience and conducts weekly look backs with the goal of achieving reductions in overall operating costs and optimization of resources. The FLC enables the well site manager to focus on performance.

1

QUALIFIED PEOPLE

FLC qualified individuals are process driven and detail oriented with extensive oil and gas experience:

- Minimum 15 years in the oil and gas industry
- QA/QC auditors from major integrated service companies
- Well-site managers
- Rig managers
- Logistic SMEs
- Service company specialists

2

EQUIPMENT MANAGEMENT

Managing site inventory to control cost and improve execution efficiency of:

- Manage routine services such as vac truck, fuel, water
- Logistical waste management
- Spares management of backup tools and equipment
- Ensuring certification of equipment is valid
- Ensuring tools arrive in condition to be utilized immediately by the operation

DMS PROCESS

EVALUATE

Evaluate the needs of the location for delivery of services and equipment with an understanding of logistical and equipment constraints in the area.

STRATEGIC PLANNING

Utilize DMS logistic planning tools to predict arrival times for operational needs and track progress continuously for changes.

IMPLEMENTATION

Communicate operational schedules and coordinate delivery of materials and services. Verify equipment certifications and conditions upon arrival and ensure procedural adherence to industry and customer standards.

AUDIT & ADJUST

Weekly review of logistical plans, constraints, and challenges to implement adjustments and improve reliability and efficiency.

PREDICTABLE RESULTS

The FLC ensures equipment and services arrive on location efficiently to manage cost and resources for reliable operations.
